DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. This application is in condition for allowance except for the presence of claims 81 to 11 directed to non-elected without traverse. Accordingly, claims 8-11 have been cancelled.

Allowable Subject Matter

3. Claims 1-7 and 12-18 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches that a liquid crystal display device and a method of fabricating the liquid crystal display device comprising various elements and steps, more specifically as the following:

a first dummy pattern within the sealant region and provided between the adjacent gate link portions, and a second dummy pattern within the sealant region and provided between the adjacent data link portions, and the width of each of the first and second dummy patterns is less than the width of the sealant pattern, or forming the sealant pattern within the sealant region to cover the first and second dummy patterns [claims 1 and 12, as shown in Figs.9A and 10A]

The closest reference such as US 6,862,069 (Kwak et al) that shows the dummy pattern structure, but the width of the dummy pattern is larger than the width of the sealant pattern, and the sealant pattern does not cover the dummy pattern. The reference Kwak has the same assignee as this application. The prior art of record does not show such dummy pattern for the purpose to uniform the cell gap and prevent the inflow of unhardened sealant material into liquid crystal layer as this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
